

# LUCAS™ CHEST COMPRESSION SYSTEM

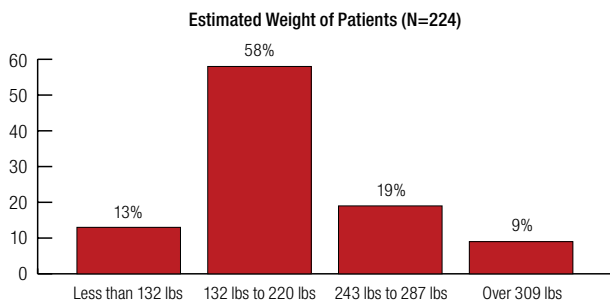

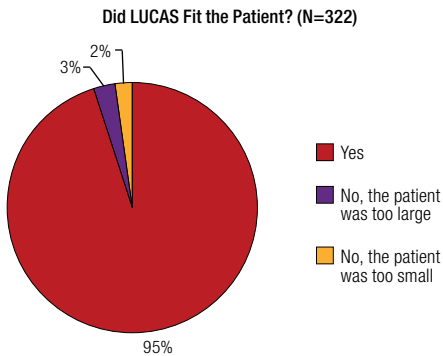

CPR Evolved™

## User Feedback on LUCAS in Prehospital Use

A survey of four different EMS systems in the U.S.<sup>1</sup> on the use of LUCAS 1, in over 300 patients, revealed the following:

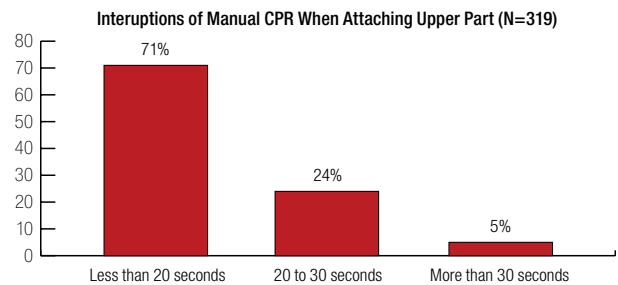

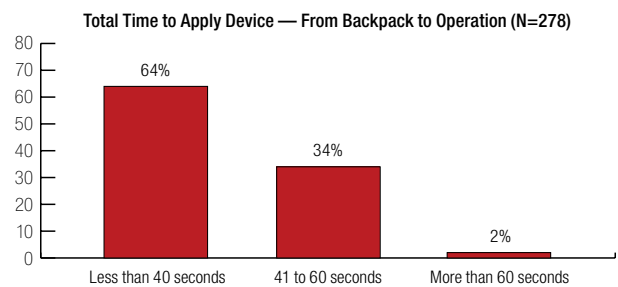

### LUCAS fit 95% of patients in 322 patient uses.

Interestingly, about half of the 5% of patients that did not fit were too small and the rest too large.

### LUCAS can be applied easily and quickly, minimizing interruptions of CPR

It generally takes less than one minute from getting the device out of the back pack to starting LUCAS compressions. Importantly, interruptions of manual CPR can be minimized during application.

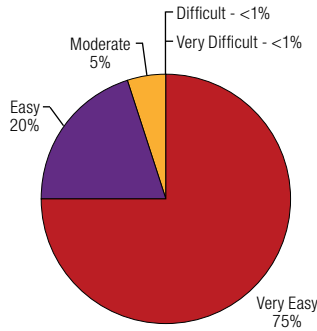

<sup>1</sup>Data based on a 300+ patient survey by end-users on the use of LUCAS 1 (pneumatic version) from four different EMS systems in the U.S. completed June 2009. Internal data on file at Jolife AB.

**LUCAS is considered very easy to use**

The average rating for the ease of use of a LUCAS was 9 on a scale of 1 to 10, with 10 being easiest and least complicated. It was proven that EMS personnel at all levels could easily learn and maintain a reasonable skill level allowing effective utilization of the device.

Ease of Operation Ratings (N=308)

**LUCAS is manufactured by JOLIFE AB in Sweden and distributed worldwide by Physio-Control, Inc.**
